

# Post-Primary Webinar: Digital Portfolios for Online Assessment & Feedback

Through the exploration of practical examples and activities, this webinar will examine the potential of using digital portfolios to support and enhance online assessment and feedback practices.

Throughout the webinar we will explore how a variety of digital platform features can be used to create engaging, meaningful and inclusive assessment-based activities and investigate how students can create and develop their own digital portfolios.

We will also address some frequently asked questions by teachers and answer attendees' questions about the use of digital portfolios live throughout the webinar
